WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 1 Vol. LXXXVIII. WEEK ENDED SATURDAY, 6TH JANUARY, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 242—134 boys and 108 girls. Exclusive of those, numbering 51, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 191.

The number of deaths registered was 202—94 males and 108 females. Of the total, 23 related to persons belonging to other localities, so that the actual number of deaths for the City was 179.

There were 2 deaths from whooping cough, one from acute infectious encephalitis and one from measles.

Tuberculosis caused 8 deaths (7 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis), as against 8, 8 and 12 from all forms of tuberculosis in the three preceding weeks.

Twenty-one deaths were due to malignant neoplasms, compared with 15, 14 and 9 in the three preceding weeks.

There were 14 deaths from pneumonia, comprising 2 from lobar pneumonia, 8 from broncho-pneumonia and 4 from pneumonia (unspecified). Bronchitis caused 7 deaths.

Eight accidental deaths were registered.

Among the deaths of infants under one year, one was due to whooping cough, one to measles, 3 to pneumonia and one to premature birth.

Nine of the deaths recorded during the week for the city were those of children under one year, three of whom were under one month old; and 101 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th January, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 2 Vol. LXXXVIII. WEEK ENDED SATURDAY, 13TH JANUARY, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 339—175 boys and 164 girls. Exclusive of those, numbering 73, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 266.

The number of deaths registered was 203—106 males and 97 females. Of the total, 27 related to persons belonging to other localities, so that the actual number of deaths for the City was 176.

There was one death from whooping cough.

Tuberculosis caused 9 deaths (all of which were from tuberculosis of the respiratory system), as against 8, 12 and 8 from all forms of tuberculosis in the three preceding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 14, 9 and 21 in the three preceding weeks.

There were 13 deaths from pneumonia, comprising 10 from broncho-pneumonia and 3 from pneumonia (unspecified). Bronchitis caused 13 deaths.

Among the deaths of infants under one year, one was due to whooping cough, 3 to pneumonia, one to congenital malformation, one to injury at birth, 5 to premature birth and one to convulsions.

Fourteen of the deaths recorded during the week for the city were those of children under one year, 7 of whom were under one month old; and 89 were those of persons aged 65 and upwards.

TABLE 1 — BIRTHS and DEATHS registered during the week ended Saturday, 13th January, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 3 Vol. LXXXVIII. WEEK ENDED SATURDAY, 20TH JANUARY, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 307—160 boys and 147 girls. Exclusive of those, numbering 57, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 250.

The number of deaths registered was 293—134 males and 159 females. Of the total, 24 related to persons belonging to other localities, so that the actual number of deaths for the City was 269.

There was one death from whooping cough, and one from measles.

Tuberculosis caused 6 deaths (all of which were from tuberculosis of the respiratory system), as against 12, 8 and 9 from all forms of tuberculosis in the three preceding weeks.

There were 20 deaths due to influenza.

Thirteen deaths were due to malignant neoplasms, compared with 9, 21 and 17 in the three preceding weeks.

There were 32 deaths from pneumonia, comprising 19 from broncho-pneumonia and 13 from pneumonia (unspecified). Bronchitis caused 11 deaths.

Among the deaths of infants under one year, one was due to whooping cough, one to measles, 4 to pneumonia, one to debility, one to injury at birth, 6 to premature birth and one to convulsions.

Eighteen of the deaths recorded during the week for the city were those of children under one year, 7 of whom were under one month old; and 158 were those of persons aged 65 and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 20th January, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 4 Vol. LXXXVIII. WEEK ENDED SATURDAY, 27TH JANUARY, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 299—165 boys and 134 girls. Exclusive of those, numbering 55, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 244.

The number of deaths registered was 326—147 males and 179 females. Of the total, 36 related to persons belonging to other localities, so that the actual number of deaths for the City was 290.

Tuberculosis caused 11 deaths (9 of which were from tuberculosis of the respiratory system and 2 from tuberculous meningitis), as against 8, 9 and 6 from all forms of tuberculosis in the three preceding weeks.

There were 59 deaths due to influenza.

Thirteen deaths were due to malignant neoplasms, compared with 21, 17 and 13 in the three preceding weeks.

There were 34 deaths from pneumonia, comprising 3 from lobar pneumonia, 24 from broncho-pneumonia and 7 from pneumonia (unspecified). Bronchitis caused 13 deaths.

Among the deaths of infants under one year, 10 were due to pneumonia, one to nephritis, and one to congenital debility.

Twelve of the deaths recorded during the week for the city were those of children under one year, one of whom was under one month old; and 186 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 27th January, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN.

No. 5 Vol. LXXXVIII WEEK ENDED SATURDAY, 3RD FEBRUARY ,1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible. to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 294—148 boys and 146 girls. Exclusive of those, numbering 51, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 253.

The number of deaths registered was 289—126 males and 163 females. Of the total, 30 related to persons belonging to other localities, so that the actual number of deaths for the City was 259.

Tuberculosis caused 12 deaths (all of which were from tuberculosis of the respiratory system), as against 9, 6 and 11 from all forms of tuberculosis in the three preceding weeks.

Thirty-nine deaths were due to influenza, compared with one, 20 and 59 in the three preceding weeks.

Three deaths were due to malignant neoplasms, compared with 17, 13 and 13 in the three preceding weeks.

There were 15 deaths from pneumonia, comprising 2 from lobar pneumonia, 6 from broncho-pneumonia and 7 from pneumonia (unspecified). Bronchitis caused 19 deaths.

Five accidental deaths were registered.

Among the deaths of infants under one year, one was due to whooping cough, one to gastro-enteritis, one to bronchitis and one to premature birth.

Five of the deaths recorded during the week for the city were those of children under one year, 2 of whom were under one month old; and 186 were those of persons aged [illegible] and upwards.

Table 1.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd February, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 6 Vol. LXXXVIII. WEEK ENDED SATURDAY, 10TH FEBRUARY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 269—143 boys and 126 girls. Exclusive of those, numbering 56, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 213.

The number of deaths registered was 256—131 males and 125 females. Of the total, 33 related to persons belonging to other localities, so that the actual number of deaths for the City was 223.

Tuberculosis caused 11 deaths (all of which were from tuberculosis of the respiratory system), as against 6, 11 and 12 from all forms of tuberculosis in the three preceding weeks.

Twenty-three deaths were due to influenza, compared with 20, 59 and 39 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 13, 13 and 3 in the three preceding weeks.

There were 8 deaths from pneumonia, comprising 5 from broncho-pneumonia and 3 from pneumonia (unspecified). Bronchitis caused 18 deaths.

One accidental death was registered.

Among the deaths of infants under one year, one was due to convulsions, 3 to premature birth, one to congenital debility, one to otitis media and one to congenital malformation.

Eight of the deaths recorded during the week for the city were those of children under one year, 2 of whom were under one month old; and 132 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th February, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 7 Vol. LXXXVIII. WEEK ENDED SATURDAY, 17TH FEBRUARY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 268—140 boys and 128 girls. Exclusive of those, numbering 68, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 200.

The number of deaths registered was 181—101 males and 80 females. Of the total, 23 related to persons belonging to other localities, so that the actual number of deaths for the City was 158.

Tuberculosis caused 12 deaths (10 of which were from tuberculosis of the respiratory system, one from tuberculous disease of spine and one from disseminated tuberculosis), as against 11, 12 and 11 from all forms of tuberculosis in the three preceding weeks.

Ten deaths were due to influenza, compared with 59, 39 and 23 in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 13, 3 and 15 in the three preceding weeks.

There were 6 deaths from pneumonia, comprising, one from lobar pneumonia, 3 from broncho-pneumonia and 2 from pneumonia (unspecified). Bronchitis caused 6 deaths.

Three accidental deaths were registered.

Among the deaths of infants under one year, one was due to convulsions, one to whooping cough, 3 to gastro-enteritis, one to pneumonia, 2 to congenital malformations, 2 to congenital debility and one to thrush.

Twelve of the deaths recorded during the week were those of persons aged 15 and under one year, 3 of whom were under one month old; and 98 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th February, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 8 Vol. LXXXVIII. WEEK ENDED SATURDAY, 24TH FEBRUARY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 273—137 boys and 136 girls. Exclusive of those, numbering 57, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 216.

The number of deaths registered was 199—112 males and 87 females. Of the total, 35 related to persons belonging to other localities, so that the actual number of deaths for the City was 164.

Tuberculosis caused 8 deaths (7 of which were from tuberculosis of the respiratory system, and one from disseminated tuberculosis), as against 12, 11 and 12 from all forms of tuberculosis in the three preceding weeks.

Nine deaths were due to influenza, compared with 39, 23 and 10 in the three preceding weeks.

Sixteen deaths were due to malignant neoplasms, compared with 3, 15 and 13 in the three preceding weeks.

There were 7 deaths from pneumonia, comprising, one from lobar pneumonia, 2 from broncho-pneumonia and 4 from pneumonia (unspecified). Bronchitis caused 12 deaths.

Four accidental deaths were registered. There was also one death by suicide.

Among the deaths of infants under one year, one was due to whooping cough, 2 to pneumonia, 3 to congenital malformations, 2 to injury at birth and 6 to premature birth.

Twenty one of the deaths recorded during the week for the city were those of children under one year, 17 of whom were under one month old; and 81 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th February, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 9 Vol. LXXXVIII. WEEK ENDED SATURDAY, 3RD MARCH 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 287—156 boys and 131 girls. Exclusive of those, numbering 57, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 230.

The number of deaths registered was 193—98 males and 95 females. Of the total, 30 related to persons belonging to other localities, so that the actual number of deaths for the City was 163.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system, and one from tuberculous meningitis), as against 11, 12 and 8 from all forms of tuberculosis in the three preceding weeks.

Three deaths were due to influenza, compared with 23, 10 and 9 in the three preceding weeks.

Nine deaths were due to malignant neoplasms, compared with 15, 13 and 16 in the three preceding weeks.

There were 11 deaths from pneumonia, comprising, one from lobar pneumonia, 5 from broncho-pneumonia and 5 from pneumonia (unspecified). Bronchitis caused 8 deaths.

Five accidental deaths were registered.

Among the deaths of infants under one year, 2 were due to whooping cough, one to gastro-enteritis, 6 to pneumonia, 3 to congenital malformations, one to injury at birth and 12 to premature birth.

Twenty six of the deaths recorded during the week for the city were those of children under one year, 19 of whom were under one month old; and 80 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd March, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 10 Vol. LXXXVIII. WEEK ENDED SATURDAY, 10TH MARCH 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the Principal Towns are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 373—196 boys and 177 girls. Exclusive of those, numbering 75, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 298.

The number of deaths registered was 181—104 males and 77 females. Of the total, 21 related to persons belonging to other localities, so that the actual number of deaths for the City was 160.

Tuberculosis caused 7 deaths (all of which were from tuberculosis of the respiratory system) as against 12, 8 and 7 from all forms of tuberculosis in the three preceding weeks.

Two deaths were due to influenza, compared with 10, 9 and 3 in the three preceding weeks.

Eighteen deaths were due to malignant neoplasms, compared with 13, 16 and 9 in the three preceding weeks.

There were 9 deaths from pneumonia, comprising one from lobar pneumonia, 6 from broncho-pneumonia and 2 from pneumonia (unspecified). Bronchitis caused 6 deaths.

Seven accidental deaths were registered, one of which was by drowning.

Among the deaths of infants under one year, 3 were due to pneumonia, one to congenital malformation and 10 to premature birth.

Sixteen of the deaths recorded during the week for the city were those of children under one year, 13 of whom were under one month old; and 75 were those of persons aged 65 and upwards.

Table 1.—BIRTHS and DEATHS registered during the week ended Saturday, 10th March, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 11 Vol. LXXXVIII. WEEK ENDED SATURDAY, 17TH MARCH 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 238—125 boys and 113 girls. Exclusive of those, numbering 53, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 185.

The number of deaths registered was 148—69 males and 79 females. Of the total, 26 related to persons belonging to other localities, so that the actual number of deaths for the City was 122.

Tuberculosis caused 5 deaths (all of which were from tuberculosis of the respiratory system) as against 8, 7 and 7 from all forms of tuberculosis in the three preceding weeks.

Six deaths were due to influenza, compared with 9, 3 and 2 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 16, 9 and 18 in the three preceding weeks.

There were 10 deaths from pneumonia, comprising one from lobar pneumonia, 5 from broncho-pneumonia and 4 from pneumonia (unspecified). Bronchitis caused 6 deaths.

Two accidental deaths were registered.

Among the deaths of infants under one year, 4 were due to pneumonia and one to premature birth.

Eight of the deaths recorded during the week for the city were those of children under one year, 3 of whom were under one month old ; and 65 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th March, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 12 Vol. LXXXVIII. WEEK ENDED SATURDAY, 24TH MARCH 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 341—166 boys and 175 girls. Exclusive of those, numbering 55, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 286.

The number of deaths registered was 160—84 males and 76 females. Of the total, 24 related to persons belonging to other localities, so that the actual number of deaths for the City was 136.

Tuberculosis caused 12 deaths (11 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 7, 7 and 5 from all forms of tuberculosis in the three preceding weeks.

Two deaths were due to influenza, compared with 3, 2 and 6 in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 9, 18 and 12 in the three preceding weeks.

There were 13 deaths from pneumonia, comprising one from lobar pneumonia and 12 from broncho-pneumonia. Bronchitis caused 6 deaths.

Five accidental deaths were registered.

Among the deaths of infants under one year 2 were due to gastro enteritis, 5 to pneumonia, one to congenital malformations and 9 to premature birth.

Twenty one of the deaths recorded during the week for the city were those of children under one year, 16 of whom were under one month old; and 63 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th March, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 13 Vol. LXXXVIII. WEEK ENDED SATURDAY, 31ST MARCH 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **362**—183 boys and 179 girls. Exclusive of those, numbering 50, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **312**.

The number of deaths registered was 166—84 males and 82 females. Of the total, **34** related to persons belonging to other localities, so that the actual number of deaths for the City was 132.

Tuberculosis caused 18 deaths (15 of which were from tuberculosis of the respiratory system, 2 from tuberculous meningitis and one from other tuberculous disease) as against 7, 5 and 12 from all forms of tuberculosis in the three preceding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 18, 12 and 13 in the three preceding weeks.

There were 8 deaths from pneumonia, comprising 3 from lobar pneumonia, 3 from broncho-pneumonia and 2 from pneumonia unspecified. Bronchitis caused 3 deaths.

Among the deaths of infants under one year, 3 were due to pneumonia, one to tuberculous meningitis, 5 to congenital malformations and 7 to premature birth.

Twenty of the the deaths recorded during the week for the city were those of children under one year, 17 of whom were under one month old; and 59 were those of persons aged 65 and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 31st March, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 14 Vol. LXXXVIII. WEEK ENDED SATURDAY, 5TH APRIL 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 338—179 boys and 159 girls. Exclusive of those, numbering 53, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 285.

The number of deaths registered was 168—79 males and 89 females. Of the total, 35 related to persons belonging to other localities, so that the actual number of deaths for the City was 133.

Tuberculosis caused 8 deaths (7 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 5, 12 and 18 from all forms of tuberculosis in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 12, 13 and 17 in the three preceding weeks.

There were 9 deaths from pneumonia, comprising one from lobar pneumonia, 5 from broncho-pneumonia and 3 from pneumonia unspecified. Bronchitis caused 4 deaths

Three accidental deaths were registered.

Among the deaths of infants under one year, 2 were due to pneumonia, one to pertussis 2 to congenital malformations and 2 to premature birth.

Twelve of the deaths recorded during the week for the city were those of children under one year, 4 of whom were under one month old; and 78 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th April, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 15 Vol. LXXXVIII. WEEK ENDED SATURDAY, 14TH APRIL 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 350—188 boys and 162 girls. Exclusive of those, numbering 62, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 288.

The number of deaths registered was 159—80 males and 79 females. Of the total, 35 related to persons belonging to other localities, so that the actual number of deaths for the City was 124.

Tuberculosis caused 15 deaths (12 of which were from tuberculosis of the respiratory system, 2 from tuberculous meningitis and one from tuberculous disease of spine) as against 12, 18 and 8 from all forms of tuberculosis in the three preceding weeks.

Fourteen deaths were due to malignant neoplasms, compared with 13, 17 and 13 in the three preceding weeks.

There were 7 deaths from pneumonia, comprising one from lobar pneumonia and 6 from broncho-pneumonia. Bronchitis caused one death.

Six accidental deaths were registered.

Among the deaths of infants under one year, 2 were due to pneumonia, 2 to congenital malformations, 3 to premature birth and 2 to congenital debility.

Nine of the deaths recorded during the week for the city were those of children under one year, 4 of whom were under one month old; and 68 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 14th April, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 16 Vol. LXXXVIII. WEEK ENDED SATURDAY, 21ST APRIL 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 366—176 boys and 190 girls. Exclusive of those, numbering 62, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 304.

The number of deaths registered was 159—94 males and 65 females. Of the total, 24 related to persons belonging to other localities, so that the actual number of deaths for the City was 135.

Tuberculosis caused 13 deaths (10 of which were from tuberculosis of the respiratory system, 2 from tuberculous meningitis and one from tuberculous disease of spine) as against 18, 8 and 15 from all forms of tuberculosis in the three preceding weeks.

There was one death from whooping cough, and one from gastro-enteritis (under 2 years).

Sixteen deaths were due to malignant neoplasms, compared with 17, 13 and 14 in the three preceding weeks.

There were 6 deaths from pneumonia, comprising 4 from broncho-pneumonia and 2 from pneumonia (unspecified). Bronchitis caused one death.

Four accidental deaths were registered.

Among the deaths of infants under one year, one was due to gastro enteritis, one to whooping cough, 3 to pneumonia, one to congenital malformations and 4 to premature birth.

Twelve of the deaths recorded during the week for the city were those of children under one year, 9 of whom were under one month old; and 69 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 21st April, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 17 Vol. LXXXVIII. WEEK ENDED SATURDAY, 28TH APRIL 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 358—182 boys and 176 girls. Exclusive of those, numbering **64**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **294**.

The number of deaths registered was 129—58 males and 71 females. Of the total, 23 related to persons belonging to other localities, so that the actual number of deaths for the City was 106.

Tuberculosis caused 9 deaths (8 of which were from tuberculosis of the respiratory system and one from disseminated tuberculosis) as against 8, 15 and 13 from all forms of tuberculosis in the three preceding weeks.

There was one death from gastro-enteritis (under 2 years).

Thirteen deaths were due to malignant neoplasms, compared with 13, 14 and 16 in the three preceding weeks.

There were 5 deaths from pneumonia, comprising 3 from broncho-pneumonia, one from lobar pneumonia and one from pneumonia (unspecified).

Five accidental deaths were registered.

Among the deaths of infants under one year, one was due to gastro-enteritis, one to pneumonia, one to congenital malformations, 2 to congenital debility and 6 to premature birth.

Twelve of the deaths recorded during the week for the city were those of children under one year, 8 of whom were under one month old; and 54 were those of persons aged 65 and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th April, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 18 Vol LXXXVIII. WEEK ENDED SATURDAY, 5TH MAY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 367—177 boys and 190 girls. Exclusive of those, numbering 61, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 306.

The number of deaths registered was 128—61 males and 67 females. Of the total, 22 related to persons belonging to other localities, so that the actual number of deaths for the City was 106.

Tuberculosis caused 16 deaths (12 of which were from tuberculosis of the respiratory system and 4 from tuberculous meningitis) as against 15, 13 and 9 from all forms of tuberculosis in the three preceding weeks.

Eight deaths were due to malignant neoplasms, compared with 14, 16 and 13 in the three preceding weeks.

There were 4 deaths from pneumonia, comprising 3 from broncho-pneumonia and one from pneumonia (unspecified).

Two accidental deaths were registered.

Among the deaths of infants under one year, one was due to tuberculous meningitis, 2 to pneumonia, 4 to congenital malformations and 4 to premature birth.

Sixteen of the deaths recorded during the week for the city were those of children under one year, 14 of whom were under one month old : and 43 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th May, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 19 Vol. LXXXVIII. WEEK ENDED SATURDAY, 12TH MAY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **346**—167 boys and 179 girls. Exclusive of those, numbering 86, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **260**.

The number of deaths registered was 119—68 males and 51 females. Of the total, **26** related to persons belonging to other localities, so that the actual number of deaths for the City was **93**.

Tuberculosis caused 8 deaths (6 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculous disease of bones) as against 13, 9 and 16 from all forms of tuberculosis in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 16, 13 and 8 in the three preceding weeks.

There were 2 deaths from pneumonia, comprising one from broncho-pneumonia and one from pneumonia (unspecified). Bronchitis caused one death.

Four accidental deaths were registered.

Among the deaths of infants under one year, one was due to measles, one to gastro-enteritis, one to congenital malformations and 2 to premature birth.

Ten of the deaths recorded during the week for the city were those of children under one year, 8 of whom were under one month old; and 52 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 12th May, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 20 Vol. LXXXVIII. WEEK ENDED SATURDAY, 19TH MAY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 348—181 boys and 167 girls. Exclusive of those, numbering 85, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 263.

The number of deaths registered was 127—61 males and 66 females. Of the total, 15 related to persons belonging to other localities, so that the actual number of deaths for the City was 112.

Tuberculosis caused 13 deaths (10 of which were from tuberculosis of the respiratory system, 2 from tuberculous meningitis and one from disseminated tuberculosis) as against 9, 16 and 8 from all forms of tuberculosis in the three preceding weeks.

Eight deaths were due to malignant neoplasms, compared with 13, 8 and 13 in the three preceding weeks.

There were 8 deaths from pneumonia, comprising 2 from lobar pneumonia, 4 from broncho-pneumonia and 2 from pneumonia (unspecified). Bronchitis caused 2 deaths.

There was one death from influenza and one from gastro-enteritis (under 2 years).

Three accidental deaths were registered.

Among the deaths of infants under one year, one was due to gastro-enteritis, 4 to pneumonia, one to congenital malformations and 5 to premature birth.

Fifteen of the deaths recorded during the week for the city were those of children under one year, 9 of whom were under one month old; and 54 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 19th May, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 21 Vol. LXXXVIII. WEEK ENDED SATURDAY, 26TH MAY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 408—211 boys and 197 girls. Exclusive of those, numbering 84, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 324.

The number of deaths registered was 112—67 males and 45 females. Of the total, 23 related to persons belonging to other localities, so that the actual number of deaths for the City was 89.

Tuberculosis caused 5 deaths (3 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from disseminated tuberculosis) as against 16, 8 and 13 from all forms of tuberculosis in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 8, 13 and 8 in the three preceding weeks.

There were 6 deaths from pneumonia, comprising 5 from broncho-pneumonia and one from pneumonia (unspecified). Bronchitis caused one death.

There was one death from influenza.

One accidental death was registered.

Among the deaths of infants under one year, one was due to pneumonia, and one to premature birth.

Four of the deaths recorded during the week for the city were those of children under one year, all of whom were under one month old; and 45 were those of persons aged 65 and upwards.

Table 1.—BIRTHS and DEATHS registered during the week ended Saturday, 26th May, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 22 Vol. LXXXVIII. WEEK ENDED SATURDAY, 2ND JUNE 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **319**—**154** boys and **165** girls. Exclusive of those, numbering **53**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **266**.

The number of deaths registered was **137**—**70** males and **67** females. Of the total, **26** related to persons belonging to other localities, so that the actual number of deaths for the City was **111**.

Tuberculosis caused 12 deaths (9 of which were from tuberculosis of the respiratory system, one from tuberculous peritonitis and 2 from disseminated tuberculosis) as against 8, 13 and 5 from all forms of tuberculosis in the three preceding weeks.

There was one death from measles and one from diarrhoea enteritis (under 2 years.)

Eleven deaths were due to malignant neoplasms, compared with 13, 8 and 13 in the three preceding weeks.

There were 6 deaths from pneumonia, comprising 2 from lobar pneumonia, one from broncho-pneumonia and 3 from pneumonia (unspecified). Bronchitis caused 2 deaths.

Six accidental deaths were registered.

Among the deaths of infants under one year, one was due to diarrhoea and enteritis, one to miliary tuberculosis, one to congenital malformation, one to congenital debility, one to pneumonia and 7 to premature birth.

Fifteen of the deaths recorded during the week for the city were those of children under one year, 10 of whom were under one month old; and 53 were those of persons aged 65 and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd June, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 23 Vol. LXXXVIII. WEEK ENDED SATURDAY, 9TH JUNE 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **362**—**183** boys and 179 girls. Exclusive of those, numbering **64**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **298**.

The **number of deaths** registered was 120—62 males and 58 females. Of the total, 13 related to persons belonging to other localities, so that the actual number of deaths for the City was 107.

Tuberculosis caused 5 deaths (4 of which were from tuberculosis of the respiratory system, and one from tuberculosis of the adrenal glands, as against 13, 5 and 12 from all forms of tuberculosis in the three preceding weeks.

There was one death from measles.

Sixteen deaths were due to malignant neoplasms, compared with 8, 13 and 11 in the three preceding weeks.

There were 4 deaths from pneumonia, comprising one from lobar pneumonia, one from broncho-pneumonia and 2 from pneumonia (unspecified). Bronchitis caused 2 deaths.

Six accidental deaths were registered.

Among the deaths of infants under one year, 3 were due to pneumonia ,one to congenital debility and one to premature birth.

Seven of the deaths recorded during the week for the city were those of children under one year, 2 of whom were under one month old ; and 50 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th June, 1951 for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

24

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 23 Vol. LXXXVIII. WEEK ENDED SATURDAY, 16TH JUNE 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 352—182 boys and 170 girls. Exclusive of those, numbering 76, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 276.

The number of deaths registered was 92—38 males and 54 females. Of the total, 21 related to persons belonging to other localities, so that the actual number of deaths for the City was 71.

Tuberculosis caused 5 deaths (one of which was from tuberculosis of the respiratory system, 3 from tuberculous meningitis and one from miliary tuberculosis) as against 5, 12 and 5 from all froms of tuberculosis in the three preceding weeks.

Eleven deaths were due to malignant neoplasms, compared with 13, 11 and 16 in the three preceding weeks.

There were 2 deaths from pneumonia, comprising one from lobar pneumonia and one from broncho-pneumonia.

Three accidental deaths were registered.

Among the deaths of infants under one year, one was due to tuberculous meningitis, 2 to pneumonia, one to congenital malformations and 4 to premature birth.

Eleven of the deaths recorded during the week for the city were those of children under one year, 9 of whom were under one month old; and 35 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 16th June, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 25 Vol. LXXXVIII. WEEK ENDED SATURDAY, 23RD JUNE 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 415—227 boys and 188 girls. Exclusive of those, numbering 85, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 330.

The **number of deaths** registered was 102—55 males and 47 females. Of the total, 23 related to persons belonging to other localities, so that the actual number of deaths for the City was 79.

Tuberculosis caused 8 deaths (7 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 12, 5 and 5 from all forms of tuberculosis in the three preceding weeks.

Nine deaths were due to malignant neoplasms, compared with 11, 16 and 11 in the three preceding weeks.

There were 7 deaths from pneumonia, comprising one from lobar pneumonia and 5 from broncho-pneumonia.

Two accidental deaths were registered.

Among the deaths of infants under one year, 4 were due to pneumonia, 3 to congenital malformations and one to premature birth.

Eleven of the deaths recorded during the week for the city were those of children under one year, 5 of whom were under one month old; and 38 were those of persons aged 65 and upwards.

Table I.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd June, 1951, for the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 26 Vol. LXXXVIII. WEEK ENDED SATURDAY, 30TH JUNE 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **262**—**135** boys and **127** girls. Exclusive of those, numbering **58**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **204**.

The number of deaths registered was **104**—**60** males and **44** females. Of the total, **26** related to persons belonging to other localities, so that the actual number of deaths for the City was **78**.

Tuberculosis caused 2 deaths (each of which was from tuberculosis of the respiratory system) as against 5, 5 and 8 from all forms of tuberculosis in the three preceding weeks.

There were 2 deaths from whooping cough.

Four deaths were due to malignant neoplasms, compared with 16, 11 and 9 in the three preceding weeks.

There were 2 deaths from pneumonia. Bronchitis caused one death.

Five accidental deaths were registered.

Among the deaths of infants under one year, one was due to whooping cough, 2 to pneumonia, 4 to congenital malformations and 4 to premature birth.

Seventeen of the deaths recorded during the week for the city were those of children under one year, 15 of whom were under one month old; and **33** were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 30th June, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 27 Vol. LXXXVIII. WEEK ENDED SATURDAY, 7TH JULY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **416**—**213** boys and **203** girls. Exclusive of those, numbering **77**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **339**.

The **number of deaths** registered was 132—66 males and 66 females. Of the total, **25** related to persons belonging to other localities, so that the actual number of deaths for the City was **107**.

Tuberculosis caused 8 deaths (6 of which were from tuberculosis of the respiratory system and 2 were from other forms of tuberculosis) as against 5, 8 and 2 from all forms of tuberculosis in the three preceding weeks.

There was one death from measles.

Fifteen deaths were due to malignant neoplasms, compared with 11, 9 and 4 in the three preceding weeks.

There was one death from pneumonia.

Four accidental deaths were registered.

Among the deaths of infants under one year, one was due to premature birth, 3 to congenital debility.

Twelve of the deaths recorded during the week for the city were those of children under one year, 3 of whom were under one month old; and 51 were those of persons aged 65 and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th July, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 28 Vol. LXXXVIII. WEEK ENDED SATURDAY, 14TH JULY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was 258—154 boys and 104 girls. Exclusive of those, numbering 58, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 200.

The **number of deaths** registered was 114—62 males and 52 females. Of the total, 34 related to persons belonging to other localities, so that the actual number of deaths for the City was 80.

Tuberculosis caused 10 deaths (9 of which were from tuberculosis of the respiratory system and 1 was from other forms of tuberculosis) as against 8, 2 and 8 from all forms of tuberculosis in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 9, 4 and 15 in the three preceding weeks.

There was one death from pneumonia.

Three accidental deaths were registered.

Among the deaths of infants under one year, 4 were due to premature birth, and one to congenital malformations.

Seven of the deaths recorded during the week for the city were those of children under one year, 6 of whom were under one month old; and 32 were those of persons aged 65 and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 14th July, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

By Authority of the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 29 Vol. LXXXVIII. WEEK ENDED SATURDAY, 21ST JULY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the **Principal Towns** are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II information regarding the deaths recorded in the registrars' districts comprising the City of Dublin and Cork county borough respectively is published. Table III shows the number of cases of infectious diseases notified in the city of Dublin, the borough of Dun Laoghaire, and the county boroughs of Cork, Limerick and Waterford with comparative figures for each of the three preceding weeks.

CITY OF DUBLIN

The number of births registered during the week was **312—166** boys and **146** girls. Exclusive of those, numbering **60**, occurring in institutions, of infants whose mothers were admitted from other localities, the number was **252**.

The **number of deaths** registered was **115—64** males and **51** females. Of the total, **23** related to persons belonging to other localities, so that the actual number of deaths for the City was 92.

Tuberculosis caused 9 deaths (all of which were from tuberculosis of the respiratory system) as against 2, 8 and 10 from all forms of tuberculosis in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 4, 15 and 15 in the three preceding weeks.

There were 2 deaths from pneumonia and 2 from bronchitis.

Five accidental deaths were registered.

Among the deaths of infants under one year, one was due to premature birth, one to congenital malformations, one to injury at birth and one to broncho-pneumonia.

Nine of the deaths recorded during the week for the city were those of children under one year, 5 of whom were under one month old; and 50 were those of persons aged 65 years and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 21st July, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 30 Vol. LXXXVIII. WEEK ENDED SATURDAY, 28TH JULY 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 402—226 boys and 176 girls. Exclusive of those, numbering 75, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 327.

The number of deaths registered was 96—52 males and 44 females. Of the total 17 related to persons belonging to other localities, so that the actual number of deaths for the City was 79.

Tuberculosis caused 4 deaths (3 of which were from tuberculosis of the respiratory system), as against 8, 10 and 9 from all forms of tuberculosis in the three preceding weeks and one from other forms of tuberculosis.

Whooping cough caused 2 deaths.

Eight deaths were due to malignant neoplasms, compared with 15, 15 and 12 in the three preceding weeks.

There was 1 death from pneumonia and 1 from bronchitis.

Five accidental deaths were registered.

Among the deaths of infants under one year, two were due to premature birth, three to congenital malformations, three to injury at birth and two to whooping cough.

Ten of the deaths recorded during the week for the city were those of children under one year, 7 of whom were under one month old; and 42 were those of persons aged 65 years and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th July, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 31 Vol. LXXXVIII. WEEK ENDED SATURDAY, 4TH AUGUST, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 348—177 boys and 171 girls. Exclusive of those, numbering 99, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 249.

The number of deaths registered was 128—72 males and 56 females. Of the total 27 related to persons belonging to other localities, so that the actual number of deaths for the City was 101.

Tuberculosis caused 8 deaths (6 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculous peritonitis) as against 10, 9 and 4 in the three preceeding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 15, 12 and 8 in the three preceding weeks.

There were 6 deaths from pneumonia, comprising 4 from broncho-pneumonia, one from lobar pneumonia and one from pneumonia (unspecified). Bronchitis caused 4 deaths and influenza one.

Three accidental deaths were registered.

Among the deaths of infants under one year, 1 was due to premature birth, 2 to broncho-pneumonia, 1 to injury at birth, two to infection of the upper respiratory tract and one to gastro-enteritis.

Nine of the deaths recorded during the week for the city were those of children under one year, 3 of whom were under one month old; and 60 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 4th August, 1951 for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 32 Vol. LXXXVIII. WEEK ENDED SATURDAY, 11TH AUGUST, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 258—148 boys and 110 girls. Exclusive of those, numbering 63, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 195.

The number of deaths registered was 109—54 males and 55 females. Of the total 20 related to persons belonging to other localities, so that the actual number of deaths for the City was 89.

Tuberculosis caused 6 deaths (5 of which were from tuberculosis of the respiratory system, and one from tuberculous meningitis) as against 9, 4 and 8 in the three preceding weeks.

Six deaths were due to malignant neoplasms, compared with 12, 8 and 17 in the three preceding weeks.

There were 2 deaths from pneumonia, comprising one from broncho-pneumonia and one from lobar pneumonia. Bronchitis caused 3 deaths.

Two accidental deaths were registered.

Among the deaths of infants under one year, 5 were due to premature birth and two to congenital malformations.

Twelve of the deaths recorded during the week for the city were those of children under one year, 10 of whom were under one month old; and 41 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 11th August, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS FOR THE PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 33 Vol. LXXXVIII. WEEK ENDED SATURDAY, 18TH AUGUST, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 396—216 boys and 180 girls. Exclusive of those, numbering 56, occurring in institutions, of infants whose mothers were admitted from other localities, the number was 340.

The number of deaths registered was 103—47 males and 56 females. Of the total 16 related to persons belonging to other localities, so that the actual number of deaths for the City was 87.

Tuberculosis caused 4 deaths (3 of which were from tuberculosis of the respiratory system, and one from tuberculous meningitis) as against 4, 8 and 6 in the three preceding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 8, 17 and 6 in the three preceding weeks.

There was one death from broncho-pneumonia. Bronchitis caused 4 deaths.

Three accidental deaths were registered.

Among the deaths of infants under one year, one was due to premature birth, one to congenital malformations, one to whooping cough and one to infection of the upper respiratory tract.

Six of the deaths recorded during the week for the city were those of children under one year, 4 of whom were under one month old; and 51 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 18th August, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 34 Vol. LXXXVIII. WEEK ENDED SATURDAY, 25TH AUGUST, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 325—184 boys and 141 girls, while the number of births to mothers normally resident in the County Borough was 250.

The number of deaths registered was 96—42 males and 54 females. The number of deaths of persons resident in the County Borough was 77.

Tuberculosis caused 7 deaths (5 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis and one from tuberculosis of the spine) as against 8, 5 and 4 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 17, 6 and 17 in the three preceding weeks.

Two accidental deaths were registered.

Among the deaths of infants under one year, one was due to premature birth, one to meningitis and one to infection of the upper respiratory tract.

Five of the deaths recorded during the week for the County Borough were those of children under one year, 4 of whom were under one month old; and 40 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 25th August, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS	POPULATION (a)	BIRTHS	DEATHS	DEATHS

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 35 Vol. LXXXVIII. WEEK ENDED SATURDAY, 1ST SEPTEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 286—135 boys and 151 girls, while the number of births to mothers normally resident in the County Borough was 246.

The number of deaths registered was 101—44 males and 57 females. The number of deaths of persons resident in the County Borough was 91.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 6, 4 and 7 in the three preceding weeks.

There was one death from streptococcal sore throat and one from acute infectious encephalitis.

Twenty-one deaths were due to malignant neoplasms, compared with 6, 17 and 12 in the three preceding weeks.

Pneumonia caused 3 deaths.

One accidental death was registered.

Among the deaths of infants under one year, one was due to acute pharyngitis, one to respiratory tract infection, one to broncho-pneumonia, one to gastro-intestinal infection, one to pneumonia of newborn, and one to premature birth.

Seven of the deaths recorded during the week for the County Borough were those of children under one year, 4 of whom were under one month old ; and 48 were those of persons aged 65 years and upwards.

TABLE 1 —BIRTHS and DEATHS registered during the week ended Saturday, 1st September, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 36 Vol. LXXXVIII. WEEK ENDED SATURDAY, 8TH SEPTEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 275—148 boys and 127 girls, while the number of births to mothers normally resident in the County Borough was 215.

The number of deaths registered was 111—57 males and 54 females. The number of deaths of persons resident in the County Borough was 97.

Tuberculosis caused 6 deaths (5 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 4, 7 and 7 in the three preceding weeks.

Seventeen deaths were due to malignant neoplasms, compared with 17, 12 and 21 in the three preceding weeks.

Pneumonia caused 5 deaths and bronchitis caused one.

Two accidental deaths were registered.

Among the deaths of infants under one year, one was due to lobar pneumonia, one to broncho-pneumonia, 2 to congenital malformations, 5 to birth injury and 4 to premature birth.

Seventeen of the deaths recorded during the week for the County Borough were those of children under one year, 11 of whom were under one month old ; and 45 were those of persons aged 65 years and upwards.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 8th September, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 37 Vol. LXXXVIII. WEEK ENDED SATURDAY, 15TH SEPTEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 295—150 boys and 145 girls, while the number of births to mothers normally resident in the County Borough was 223.

The number of deaths registered was 94—50 males and 44 females. The number of deaths of persons resident in the County Borough was 74.

Tuberculosis caused 4 deaths (3 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 7, 7 and 6 in the three preceding weeks.

Fourteen deaths were due to malignant neoplasms, compared with 12, 21 and 17 in the three preceding weeks.

Pneumonia caused 2 deaths and 2 were due to bronchitis.

Six accidental deaths were registered.

Among the deaths of infants under one year, one was due to gastro enteritis, one to congenital malformations and one to premature birth.

Four of the deaths recorded during the week for the County Borough were those of children under one year, 2 of whom were under one month old ; and 38 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 15th September, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 38 Vol. LXXXVIII. WEEK ENDED SATURDAY, 22ND SEPTEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 266—143 boys and 123 girls, while the number of births to mothers normally resident in the County Borough was 201.

The number of deaths registered was 91—51 males and 40 females. The number of deaths of persons resident in the County Borough was 64.

Tuberculosis caused 4 deaths (all of which were from tuberculosis of the respiratory system as against 7, 6 and 4 in the three preceding weeks.

Sixteen deaths were due to malignant neoplasms, compared with 21, 17 and 14 in the three preceeding weeks.

Pneumonia caused 4 deaths and 4 were due to bronchitis.

One accidental death was registered.

Among the deaths of infants under one year, one was due to pneumonia and one to injury at birth.

Three of the deaths recorded during the week for the County Borough were those of children under one year, 2 of whom were under one month old ; and 23 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 22nd September, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 39 Vol. LXXXVIII. WEEK ENDED SATURDAY, 29TH SEPTEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 375—171 boys and 204 girls, while the number of births to mothers normally resident in the County Borough was 305.

The number of deaths registered was 104—56 males and 48 females. The number of deaths of persons resident in the County Borough was 77.

Tuberculosis caused 7 deaths (all of which were from tuberculosis of the respiratory system as against 6, 4 and 4 in the three preceding weeks.

Thirteen deaths were due to malignant neoplasms, compared with 17, 14 and 16 in the three preceeding weeks.

Pneumonia caused one death and one was due to bronchitis.

Four accidental deaths were registered.

Among the deaths of infants under one year, one was due to pneumonia, 2 to congenital debility, 3 to congenital malformations and 5 to premature birth.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year, 10 of whom were under one month old ; and 30 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th September, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 40 Vol. LXXXVIII. WEEK ENDED SATURDAY, 6TH OCTOBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 357—192 boys and 165 girls, while the number of births to mothers normally resident in the County Borough was 290.

The number of deaths registered was 116—60 males and 56 females. The number of deaths of persons resident in the County Borough was 99.

Tuberculosis caused 7 deaths (5 of which were from tuberculosis of the respiratory system and 2 from tuberculous meningitis) as against 4, 4 and 7 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 14, 16 and 13 in the three preceeding weeks.

Pneumonia caused 2 deaths and 3 were due to bronchitis.

Five accidental deaths were registered.

Among the deaths of infants under one year 3 were due to premature birth and 3 to injury at birth.

Nine of the deaths recorded during the week for the County Borough were those of children under one year, 6 of whom were under one month old ; and 48 were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th October, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 41 Vol. LXXXVIII. WEEK ENDED SATURDAY, 13TH OCTOBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 276—139 boys and 137 girls, while the number of births to mothers normally resident in the County Borough was 217.

The number of deaths registered was 78—39 males and 39 females. The number of deaths of persons resident in the County Borough was 66.

Tuberculosis caused 4 deaths (3 of which were from tuberculosis of the respiratory system and one from disseminated tuberculosis) as against 4, 7 and 7 in the three preceding weeks.

Twelve deaths were due to malignant neoplasms, compared with 16, 13 and 15 in the three preceding weeks.

Pneumonia caused one death.

One accidental death was registered.

There were no deaths of infants under one year recorded.

Deaths of persons over 65 years of age numbered 33.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 13th October, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 42 Vol. LXXXVIII. WEEK ENDED SATURDAY, 20TH OCTOBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deeths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 266—122 boys and 144 girls, while the number of births to mothers normally resident in the County Borough was 224.

The number of deaths registered was 126—60 males and 66 females. The number of deaths of persons resident in the County Borough was 104.

Tuberculosis caused 2 deaths (one of which was from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 7, 7 and 4 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 13, 15 and 12 in the three preceding weeks.

Pneumonia caused 9 deaths and 3 deaths were due to bronchitis

There was one death from gastro-enteritis.

Four accidental deaths were registered.

Among the deaths of infants under 1 year one was due to diarrhoea and enteritis, two to malformations, 2 to prematurity, three to pneumonia and four to injury at birth.

Fourteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 56.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 20th October, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3–4 COLLEGE STREET, DUBLIN

No. 43 Vol. LXXXVIII. WEEK ENDED SATURDAY, 27TH OCTOBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deeths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II. information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 288 —147 boys and 141 girls, while the number of births to mothers normally resident in the County Borough was 229.

The number of deaths registered was 129 —75 males and 54 females. The number of deaths of persons resident in the County Borough was 94.

Tuberculosis caused six deaths (4 of which were from tuberculosis of the respiratory system, one from tuberculous peritonitis and one from miliary tuberculosis) as against 7, 4 and 2 in the three preceding weeks.

Twenty deaths were due to malignant neoplasms, compared with 15, 12 and 15 in the three preceding weeks.

Pneumonia caused 2 deaths and one death was due to bronchitis.

There were two deaths from gastro-enteritis.

Two accidental deaths were registered.

Among the deaths of infants under 1 year one was due to diarrhoea and enteritis, two to malformations, 2 to prematurity and one to septicaemia.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 33.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 27th October, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 44 Vol. LXXXVIII. WEEK ENDED SATURDAY, 3RD NOVEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 364—198 boys and 166 girls, while the number of births to mothers normally resident in the County Borough was 303.

The number of deaths registered was 105—54 males and 51 females. The number of deaths of persons resident in the County Borough was 84.

Tuberculosis caused 8 deaths (7 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 4, 2 and 6 in the three preceding weeks.

Nineteen deaths were due to malignant neoplasms, compared with 12, 15 and 20 in the three preceding weeks.

There was one death from influenza and 4 from pneumonia. Bronchitis caused 2 deaths.

One accidental death was registered.

Among the deaths of infants under 1 year one was due to pneumonia, 3 to malformations and one to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 46.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd November, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 45 Vol. LXXXVIII. WEEK ENDED SATURDAY, 10TH NOVEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deeths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 333—176 boys and 157 girls, while the number of births to mothers normally resident in the County Borough was 269.

The number of deaths registered was 102—52 males and 50 females. The number of deaths of persons resident in the County Borough was 83.

Tuberculosis caused 11 deaths (9 of which were from tuberculosis of the respiratory system and two from tuberculous meningitis) as against 2, 6 and 8 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 15, 20 and 19 in the three preceding weeks.

There were 3 deaths from pneumonia.

Three accidental deaths were registered, one of which was by drowning.

Among the deaths of infants under 1 year one was due to malformations and 2 to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 35.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th November, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 46 Vol. LXXXVIII WEEK ENDED SATURDAY, 17TH NOVEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 286—161 boys and 125 girls, while the number of births to mothers normally resident in the County Borough was 229.

The number of deaths registered was 136—82 males and 54 females. The number of deaths of persons resident in the County Borough was 118.

Tuberculosis caused 9 deaths (all of which were from tuberculosis of the respiratory system) as against 6, 8 and 11 in the three preceding weeks.

Twenty-one deaths were due to malignant neoplasms, compared with 20, 19 and 15 in the three preceding weeks.

There were 4 deaths from pneumonia and bronchitis caused 2 deaths.

Six accidental deaths were registered, two of which were by drowning.

Among the deaths of infants under 1 year one was due to malformations, 2 to pneumonia, one to debility and 5 to prematurity.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 64.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th November, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 47 Vol. LXXXVIII. WEEK ENDED SATURDAY, 24TH NOVEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 302—168 boys and 134 girls, while the number of births to mothers normally resident in the County Borough was 231.

The number of deaths registered was 108—60 males and 48 females. The number of deaths of persons resident in the County Borough was 91.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis), as against 8, 11 and 9 in the three preceding weeks.

Twenty deaths were due to malignant neoplasms, compared with 19, 15 and 21 in the three preceding weeks.

There were 3 deaths from pneumonia and bronchitis caused 3 deaths.

One accidental death was registered, which was by drowning.

Among the deaths of infants under 1 year one was due to congestion of lungs, one to pneumonia, and one to prematurity.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th November, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 48 Vol. LXXXVIII. WEEK ENDED SATURDAY, 1ST DECEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 259—126 boys and 133 girls, while the number of births to mothers normally resident in the County Borough was 205.

The number of deaths registered was 98—45 males and 53 females. The number of deaths of persons resident in the County Borough was 85.

Tuberculosis caused 4 deaths (all of which were from tuberculosis of the respiratory system) as against 11, 9 and 7 in the three preceding weeks.

Twenty deaths were due to malignant neoplasms, compared with 15, 21 and 20 in the three preceding weeks.

There were 5 deaths from pneumonia and bronchitis caused one death.

Two accidental deaths were registered.

Among the deaths of infants under 1 year, 3 were due to pneumonia and 3 to congenital malformations.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 42.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 1st December, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 49 Vol. LXXXVIII. WEEK ENDED SATURDAY, 8TH DECEMBER, 1951. PRICE 2d. Net.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 301—159 boys and 142 girls, while the number of births to mothers normally resident in the County Borough was 242.

The number of deaths registered was 132—65 males and 67 females. The number of deaths of persons resident in the County Borough was 110.

Tuberculosis caused 9 deaths (8 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 9, 7 and 4 in the three preceding weeks.

Twenty deaths were due to malignant neoplasms, compared with 21, 20 and 20 in the three preceding weeks.

There were 3 deaths from pneumonia and bronchitis caused 4 deaths.

Five accidental deaths were registered.

Among the deaths of infants under 1 year, one was due to tuberculous meningitis, 2 to pneomonia, 3 to congenital malformations, 2 to injury at birth, one to congenital debility and 5 to premature birth.

Seventeen of the deaths recorded during the week for the County Borough were those of children under one year of age, 12 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 8th December, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 50 Vol. LXXXVIII. WEEK ENDED SATURDAY, 15TH DECEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 258—131 boys and 127 girls, while the number of births to mothers normally resident in the County Borough was 205.

The number of deaths registered was 115—69 males and 46 females. The number of deaths of persons resident in the County Borough was 98.

Tuberculosis caused 7 deaths (6 of which were from tuberculosis of the respiratory system and one from tuberculous meningitis) as against 7, 4 and 9 in the three preceding weeks.

Eighteen deaths were due to malignant neoplasms, compared with 20, 20 and 20 in the three preceding weeks.

There were 4 deaths from pneumonia and bronchitis caused 4 deaths.

Five accidental deaths were registered.

Among the deaths of infants under 1 year, one was due to gastro enteritis, one to tuberculous meningitis, 2 to pneumonia, 3 to congenital malformations, one to injury at birth and one to premature birth.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 15th December, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 51 Vol. LXXXVIII. WEEK ENDED SATURDAY, 22ND DECEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 268—140 boys and 128 girls, while the number of births to mothers normally resident in the County Borough was 207.

The number of deaths registered was 141—79 males and 62 females. The number of deaths of persons resident in the County Borough was 116.

Tuberculosis caused 6 deaths (3 of which were from tuberculosis of the respiratory system, one from tuberculous meningitis one from tuberculous enteritis and one from miliary tuberculosis) as against 4, 9 and 7 in the three preceding weeks.

Fifteen deaths were due to malignant neoplasms, compared with 20, 20 and 18 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 2 deaths.

Two accidental deaths were registered.

Among the deaths of infants under 1 year, 2 were due to gastro enteritis, 4 to pneumonia, one to injury at birth, 3 to injury at birth with prematurity, and 2 to premature birth.

Sixteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 12 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 22nd December, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS
FOR THE
PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Registrar-General

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, 3-4 COLLEGE STREET, DUBLIN

No. 52 Vol. LXXXVIII. WEEK ENDED SATURDAY, 29TH DECEMBER, 1951. PRICE 2d. NET.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned, so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious deseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 53—25 boys and 28 girls, while the number of births to mothers normally resident in the County Borough was 46.

The number of deaths registered was 75—27 males and 48 females. The number of deaths of persons resident in the County Borough was 64.

Tuberculosis caused 2 deaths (both of which were from tuberculosis of the respiratory system), as against 9, 7 and 6 in the three preceding weeks.

Four deaths were due to malignant neoplasms, compared with 20, 18 and 15 in the three preceding weeks.

There were 6 deaths from pneumonia and bronchitis caused 4 deaths.

Two accidental deaths were registered.

Among the deaths of infants under 1 year, one was due to gastro enteritis, one to pneumonia, one to bronchial asthma, one to atelectasis and 2 to congenital malformations.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 2 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 36.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th December, 1951, for the Principal Towns with similar particulars for BELFAST and DERRY.
